

CLASSROOM RULES

My philosophy of discipline is based on the belief that children need affectionate care and firm guidelines. To establish good order and help the children learn self-control, the children will be guided to respect themselves and their peers through specific directions, positive reinforcement, suggested new activities and responsible actions. Please discuss the following rules with your child.

Our Most Important Rule:

Respect

If we respect ourselves and others we will want to be the best person we can be.

Our Golden Rule:

Treat others how you want to be treated!

Other Objectives That Help Us

Learn and Work Together:

1. We raise our hand to speak.
2. We work quietly.
3. We listen and follow directions.
4. We share with one another.
5. We are kind to each other.
6. We always walk inside the school and on sidewalks.
7. We use inside voices in the classroom.
8. We put our things away and clean up our own messes.

We will model and practice these rules thoroughly at the beginning of the year and brush up on them as needed.

The ways children behave in class affect all of the activities that go on in the classroom. Learning occurs more smoothly when children are considerate, cooperative, and socially competent. Our rules and routines are developed to help support a positive learning environment. We spend a great deal of time understanding, discussing, modeling, and practicing the rules and routines so the children know what is expected of them. Positive and appropriate behavior will be recognized daily.
